User Manual

WARNING: Combining other brands' charger and appendant may lead to malfunction.

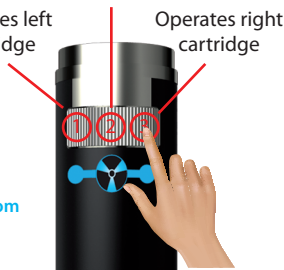

To remove cartridge(s) from the device, turn counter clock-wise.

Power Button

Operates both cartridges

Operates left cartridge

Operates right cartridge

The power button has 3 functions as shown above

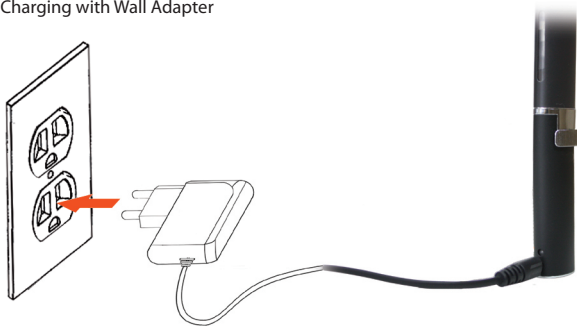

- Push the left side of the button to activate the left cartridge.
- Push the right side of the button to activate the right cartridge.
- Push the center of the button to activate the mix of the two cartridges.

The Ion Lithium rechargeable battery comes with a power saving/safety function which allows you to lock & unlock the battery. This will prevent battery usage when not in use.

The Nuke will arrive with the battery in factory setting, which will be in the locked mode. To unlock the battery, press the power button 5 consecutive times within 2 seconds, the LED button will flash 3 times to indicate the unlocked mode. Repeat these steps to lock the battery.

■ Charging with Wall Adapter

■ Charging with Wired USB Charger at a Computer or in a Car (Car Adapter not included)

1

- Remove cartridge from battery before refilling.

2

- Remove silicon cap and refill formula with included syringe bottle $\frac{3}{4}$ of the way.

3

- Make sure the syringe is on the outside of the ceramic, so the formula goes around the outside portion of the cartridge.
- Do not pour formula directly into ceramic portion of the cartridge.

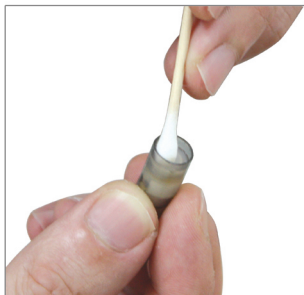

- Remove cartridge from the battery, use a piece of tissue to clean the outside of the cartridge.

- Use a piece of tissue or cotton swab to clean the battery, cartridge and mouthpiece.

- Clean regularly and avoid dust getting into the device.

Liquid Charging Method

■ Thick or Waxy Substances

1. Remove plastic cap from cartridge.
2. Drip or Dab oil or waxy content directly onto wick.
3. Place mouthpiece back.
4. Inhale as you continuously press on power button.

■ Trouble Shoot-

1. Allow battery to be fully charged.
2. Make sure cartridge is installed properly.
3. Make sure battery and cartridge connectors are free of debris or oils.
4. Make sure cartridge is filled.

■ Warnings-

1. Do not leave cartridge attached to battery when not in use.
2. Check cartridge for any cracks or leaks before using.
3. Keep away from hazardous materials, do not immerse in water.
4. Do not connect your battery and cartridge with oil residue on connectors.
